1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 8-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Oxford.

Oxford discloses a method for allocating real-time audio data from a first plurality of audio channels in a system having a first processor and a second processor, the method comprising: providing a second plurality of memory banks of semiconductor memory devices (104), each memory bank being accessible to the first (102) and second (103) processors for operation selected from the group comprising read and write operations (col. 4, lines 20 to 22); and storing subsets of the audio data in the second plurality of memory banks, the subsets corresponding to different groups of audio channels (inherent since 103 is an audio processor).

3. Claims 3-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Applicant's arguments with respect to claims 1 to 15 have been considered but are moot in view of the new ground(s) of rejection.
